

Product Specifications: **BarnCraft® Pull Handles**

Sliding Door Pull Handles

- 1) Pull handles for BarnCraft sliding doors are real hand-wrought iron or stainless steel. Slight appearance/size variance can be expected.
- 2) Pull Handles are packaged separately and uninstalled on all GlassCraft door products so the doors may be properly finished before installation. Handles are individually bagged and boxed with screw fasteners included.
- 3) Handles may be ordered individually, without other products.
- 4) Metal door handles may be "touched up" with any exterior grade metal paint, such as Rustoleum™ if needed.
